

Joint fellowship trains fisheries scientists to inform management

November 2017

Fellows apply through one of

33

University-based Sea Grant programs

Fellowship awards last

2 or 3

years depending on the program of study

Fellows are guided by two

mentors

one from the fellow's university and one from NMFS

Since 1990, the National Marine Fisheries Service (NMFS) and Sea Grant have partnered on the NMFS-Sea Grant Joint Fellowship program to support PhD level students in the areas of population and ecosystem dynamics and marine resource economics.

40%

of alumni work for NMFS as fisheries scientists or other professionals

113

PhD students have participated in the program since it began in 1990

The NMFS-Sea Grant Joint Fellowship is a focused workforce development program to train highly qualified individuals in

Population and Ecosystem Dynamics and Marine Resource Economics

ANNUAL RESEARCH SYMPOSIUM

provides an opportunity for fellows and NOAA fisheries professionals to exchange ideas and advance related scientific and management fields of study
