

HAWAI'I SEA GRANT

BY THE NUMBERS

Hawai'i Sea Grant provides integrated research, extension, and education activities that increase understanding and wise stewardship of Hawai'i's coastal and marine resources. The following numbers represent some of the ways that we impacted coastal communities in 2015 alone.

RESEARCH EXTENSION OUTREACH

Hawai'i Sea Grant created or sustained **46 JOBS** for an economic benefit of at least **\$3.6 MILLION**

610 fishers who modified their practices as a result of Hawai'i Sea Grant activities

13,790 Volunteer hours completed

28 Graduate students and fellows supported

45 Undergraduate students supported

26 publications in peer reviewed journals

140,938 K-12 students reached through Sea Grant education programs

70

Trainings to improve coastal community resilience

426

Acres of coastal habitat restored

37

Communities implemented sustainable development practices and policies

130

Resource managers used ecosystem-based approaches
