

NELHA/Hawai'i Aquaculture Collaborative Tech & Research Brown Bag
Wednesday, November 8, 2023

Noon – 12:30 p.m.

Via Zoom: <https://hawaii.zoom.us/j/93826821539>

Or streamed live in the NELHA Hale Iako Conference Room

Title: UPDATE – Campbell Feed Facility

Description:

Diamond Head Seafood will provide an update on the production of feeds for local aquaculture. The Campbell facility on Oahu will use Hawai'i's waste processed into meal which will be used to produce feeds for local growers. A pellet production line will be set up to produce 300 pounds/hour. The goal is to test feeds before building a 2,000 pound/hour mill. Preliminary inquiries indicate there is an annual need of over 5 million pounds.

Diamond Head Seafood Team:

Mike Irish, CEO

Mike Yonemura, President

Ryan Murashige, Director of Aquaculture & Director of the Feed Mill Project

Troy Antonelis, Director of Sales & Operations
